MRS. ALMA TIMTIMAN
Chief Administrative Officer, LMD-PESO Marinduque
Capitol Compound, Santol, Boac, Marinduque

Dear Ma'am Timtiman,

Good Day!

As part of the requirements in our course, CAP301—Capstone Project 1 the degree Bachelor of Science in Information Technology (BSI/T), the undersigned, who are third-year students from the College of Information and Computing Sciences of Marinduque State University, would like to request your good office to allow us to conduct a preliminary investigation on the existing processes and operations in your organization, mainly in your Office. The course's primary requirement is to develop a project proposal that focuses on the course's underlying principles, drawing on the organization's identified problems.

As of now, we are conceptualizing the project entitled "STRAM-PESO: An Online Employment and Applicant Management System for Public Employment Service Office".

In this regard, may we earnestly ask your permission to please allow us to make your organization the subject of this undertaking and be able to do the following activities:

- Conduct data-gathering activities like interviews and observations about the day-to-day business transactions your organization delivers;
- Ask for background information about the organization and its business goals and objectives;
- Take pictures of the business setup or physical establishment;
- Gather sample forms used in daily transactions, especially related to this proposed study
- Conduct follow-up meetings through Face-to-Face, Google Meet, or Zoom for consultation, if necessary.

Rest assured that all data and information acquired while pursuing the study shall be treated with utmost confidentiality and only be used for the said purpose.

Your anticipated positive response regarding the matter will be highly appreciated.

Respectfully yours,

ALEXIS M. ECHON

APPENDIX D

Interview Questionnaires

For LMD-PESO Marinduque Coordinator

A. General System Overview

1. Main Purpose of LMD PESO

- To provide jobs and livelihood opportunities for those in need. The core mission is employment facilitation. *“is about trabaho. Trabaho too.”*

2. External Entities that Interact with LMD PESO

- Applicants
- Employers (private industry)
- DOLE
- TESDA
- LGU (for venues, partnerships)
- DTI (for livelihood programs)
- DMW / OWA (for migrant workers)
- DSWD (for solo parents and vulnerable groups)

3. Major Services/Processes Provided

- Referral and placement (job vacancies, job fairs)
- Job matching and career guidance (CDSP, LEGS)
- Registration (NSRP forms)
- Labor market information (LMI forms, reports)
- Special programs: SPES, OJT/WAP, livelihood training with starter kits

4. Major Inputs Received

- Applicant data (forms, resumes)
- Employer job vacancy details (requirements, qualifications)
- Government program data (SPES, Tupad, livelihood training)
- Forms from agencies (TESDA, DOLE, DTI, etc.)

5. Major Outputs Sent

- Referral lists and placement reports to employers
- Reports to DOLE (SPRS monthly, PACE system)
- Feedback to partner agencies (TESDA, LGU, DTI, DSWD, DMW/OWA)
- Job postings and vacancy announcements

B. Detailed Processes

1. Step-by-Step Process (Example: Employer Job Request)

- Employer submits NSRP form and establishment details.
- LMD PESO encodes job vacancy info (requirements, qualifications).
- Job posting is published (Google, PESO page).
- Applicants submit resumes.
- PESO screens and refers qualified applicants.

- The employer conducts an interview/exam.
 - Employer reports hired applicants back to PESO.
 - PESO submits a report to DOLE/PACE.
- 2.
 3. **Who Performs Each Step**
 - LMI Division staff handle encoding, referral, and reporting.
 - Employers handle interviews/exams.
 - DOLE oversees reporting.
 4. **Forms/Documents Used**
 - NSRP forms (applicant registration)
 - Establishment forms (employer details)
 - LMI forms (data collection)
 - SPES forms, livelihood training forms
 5. **Data Captured in Each Step**
 - Applicant personal info, qualifications, resumes
 - Employer vacancy details
 - Referral outcomes (hired/not hired)
 6. **Decisions Made & Conditions**
 - Screening applicants based on qualifications
 - Referral only if NSRP form is completed
 - Employer decides final hiring outcome
 7. **Duration of Steps**
 - Referral to hiring: 1–3 weeks (depending on exams/interviews)
 - Job fairs: sometimes “hired on the spot”
 8. **Data Storage**
 - PEIS system (main database)
 - Excel File spreadsheets (backup/reporting)
 - LMI forms (paper-based, now digitized)

C. Data and Documents – Data Stores & Data Dictionary

1. **Forms, Reports, Documents Used**
 - NSRP forms
 - Establishment forms
 - LMI forms (Form 1 for applicants, Form 2 for establishments)
 - SPES forms
 - SPRS monthly reports
2. **Form Details**
 - NSRP: filled by applicants, goes to PESO database
 - Establishment form: filled by employers, stored in PESO records
 - LMI forms: filled by staff, reported to DOLE
3. **Databases/Spreadsheets/Logbooks**

- PEIS system (main)
- Excel File (backup/reporting)
- Logbooks (used before, now phased out)
- 4. **Access Control**
 - LMI Division staff can add/edit/delete data
 - Employers/applicants only submit forms
- 5. **Data Backup**
 - Daily backups by staff
 - Stored in PEIS and Excel File

D. Problems & Requirements – As-Is vs To-Be

1. **Common Problems/Delays**
 - Internet/system issues with PEIS
 - Duplicate applications (online + walk-in)
 - Limited private job vacancies
2. **Duplicate Tasks/Paperwork**
 - Applicants applying multiple times
 - Redundant encoding of employer details
3. **Regular Reports Submitted**
 - SPRS monthly to DOLE
 - Generated via PEIS and Excel File
4. **Three Suggested Improvements**
 - Updated information on schools/courses
 - More private job vacancies
 - Better system automation and updates
5. **Manual Tasks to Automate**
 - Sorting and encoding entries
 - Updating applicant records
 - Generating reports

E. System Rules & Policies

1. **DOLE/LGU Policies**
 - Processes depend on program-specific DOLE/LGU guidelines
 - Reporting rules (SPRS submission)
2. **Validation Rules**
 - Applicant cannot be referred without NSRP form
 - Data requests require formal letters due to privacy
3. **Retention/Disposal Policy**
 - Digital records in PEIS: permanent
 - Paper records: kept for 3 years, then disposed/sold

APPENDIX E

Online Survey Questionnaire

Good Day Respondents!

We are 3rd Year College Students from BSIT, conducting a research survey about our project entitled “STRAM-PESO: Skills Training, Referral, and Monitoring System for PESO” under the Public Employment Service Office.

Your participation is highly valuable. This survey aims to gather insights about the development and use of an online employment and training management system.

All responses will be kept strictly confidential and used for academic purposes only.

☐ I have read the Terms and Conditions and agree voluntarily

Survey Questionnaire

1. How receptive are you to using an online system for PESO services (job matching, training, and referral)?

- Very receptive
- Not receptive

2. How often do you prefer using online platforms for job searching or training applications?

- Always
- Sometimes
- Never

3. What is your level of comfort in using a web-based system for registration and application?

- Very comfortable
- Not comfortable

4. Do you think an online PESO system can improve access to job opportunities?

- Yes, significantly
- No, not really

5. How important is internet access in using PESO’s services if they are fully digital?

- Very important
- Not important

6. What challenges might you face when using an online PESO system? (Check all that apply)

- Lack of internet access
- Lack of digital skills
- System complexity
- None

7. How helpful would an online system be in tracking your job application status?

- Very helpful
- Not helpful

8. What features do you expect from an online STRAM-PESO system? (Check all that apply)

- Online registration
- Job matching system

- Training enrollment
- Application tracking

9. How useful are online notifications (SMS/email/app alerts) for updates and job opportunities?

- Very useful
- Not useful

10. How do you prefer to access PESO services online? (Check all that apply)

- Mobile phone
- Computer/Laptop
- Public internet kiosk
- Other: _____

11. Do you think digitizing PESO records will improve processing speed?

- Yes
- No

12. How secure do you feel about submitting your personal information online?

- Very secure
- Not secure

13. What improvements do you expect from an online referral system?

- Faster job placement
- Better monitoring of applicants

14. Do you prefer an all-in-one system for training, job matching, and monitoring?

- Yes
- No

15. Would you recommend using an online PESO system to other job seekers?

- Yes
- No

APPENDIX I

Use Case Diagram

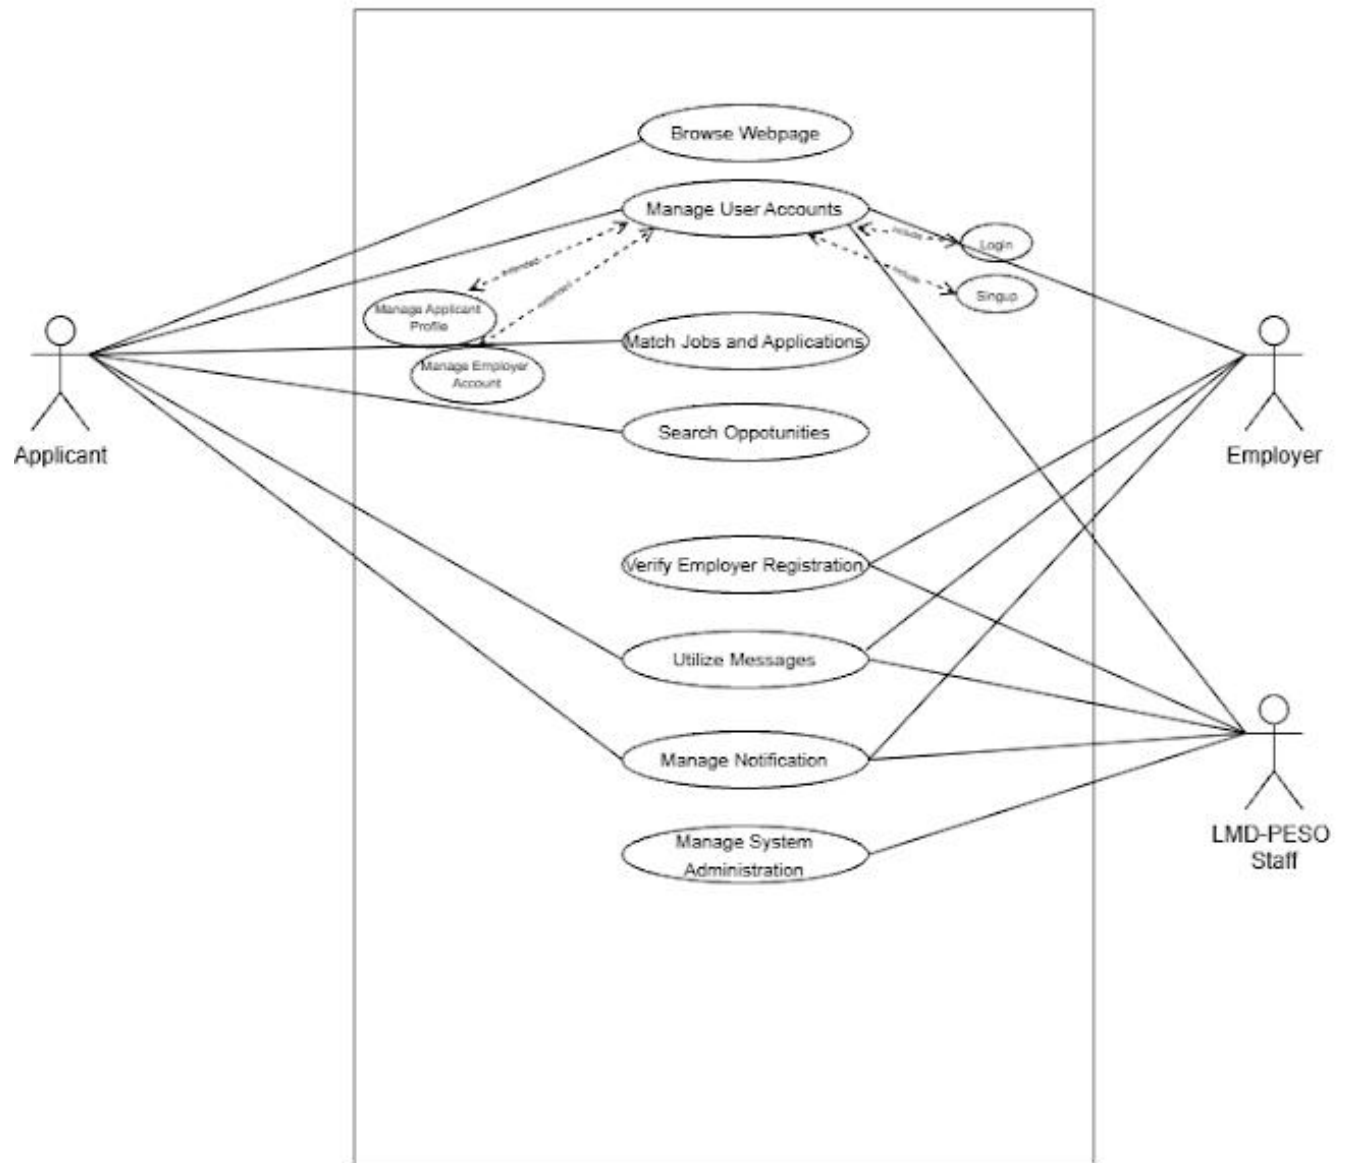

Figure 12: Use Case Diagram

USE CASE STORY OF DEVELOPED SYSTEM

1. Use Case Title: Browse Webpage

Description: This use case allows any visitor or registered user to browse the STRAM-PESO webpage, including the homepage, job listings, company information, and public announcements, without requiring authentication.

Primary Actor: Applicant (Job Seeker), Employer, LMD-PESO Staff

Goal: To allow users and visitors to freely navigate and access publicly available information on the platform.

Pre-Conditions:

- The system is accessible via a web browser.
- Internet connectivity is available.

Post-Conditions:

- The visitor or user can view public content on the platform.
- Users are presented with options to log in or sign up for full access.

a. View Homepage

Actor: Any visitor or user

Goal: To access and explore the main landing page of the STRAM-PESO platform.

Actor	System
1. Visitor opens the STRAM-PESO webpage.	2. The system loads and displays the homepage with navigation options.
3. The visitor browses the page content (announcements, featured jobs, info).	4. The system renders all public content including links to sign up and log in.
5. Visitor clicks on a navigation link or section.	6. The system redirects the visitor to the selected page or section.

b. View Public Job Listings

Actor: Any visitor or user

Goal: To explore available job postings without logging in.

Actor	System
1. Visitor navigates to the Job Listings section.	2. The system retrieves and displays all approved and active job postings.
3. Visitor browses job listings and clicks on a posting.	4. The system displays the job title, company name, and brief description.
5. Visitor attempts to apply or view full details.	6. The system prompts the visitor to log in or register to proceed.

2. Use Case Title: Manage User Accounts

Description: This use case enables users to register new accounts, log in to existing accounts, and manage their account settings. It facilitates secure authentication and profile management to ensure proper access to the system.

Primary Actor: Job Seeker, Employer, LMD-PESO Head/Staff

Goal: To efficiently manage user accounts for all roles, ensure proper role assignment, facilitate secure access, and allow for account recovery.

Pre-Conditions:

- The user has a valid email address.
- For login, the user must have a previously registered account.
- Email notifications must be configured.

Post-Conditions:

- User accounts are successfully created or updated with the correct roles and access.
- The user is authenticated and redirected to their personalized dashboard.
- Users can securely log in.

a. Sign Up

Actor: Job Seeker, Employer

Goal: To create a new account and gain access to the STRAM-PESO platform.

Actor	System
1. User clicks 'Sign Up' on the homepage.	2. The system displays the registration form.

3.User fills in required details: name, email, password, and role (Job Seeker or Employer).	4.The system validates input fields in real-time.
5.User submits the registration form.	6.The system creates a new account and sends a verification code via email.
7.User verifies their email address.	8.The system activates the account and redirects the user to their dashboard.

b. Log In

Actor: Job Seeker, Employer, LMD-PESO Head/Staff

Goal: To securely authenticate and access the system.

Actor	System
1.User clicks 'Log In' on the homepage.	2.The system displays the login form.
3.User enters registered email and password.	4.The system validates credentials against the database.
5.User clicks 'Log In'.	6.The system authenticates the user and redirects to the dashboard.

c Manage Applicants Profile, Create and Update Profile

Actor: Job Seeker, Employer

Goal: To create or update personal or company profile information on the platform.

Actor	System
1.User logs in and navigates to their profile settings.	2.The system displays the current profile with editable fields.
3.User updates personal information (name, contact details, address).	4.The system validates the new information entered by the user.
5.User saves the changes.	6.The system updates the profile information in the database and confirms the changes.

Z

d. Upload Resume

Actor: Job Seeker

Goal: To upload or update a resume linked to the jobseeker's profile.

Actor	System
Job seeker navigates to the Resume section.	The system displays the current resume upload interface.
Job seeker selects and uploads a resume file.	The system validates the file and stores it in the database.
	The system links the resume to the jobseeker's profile and confirms the upload.

e. Track Application History

Actor: Job Seeker

Goal: To view and monitor all job applications submitted through the platform.

Actor	System
1.Job seeker navigates to the Application History section.	2.The system retrieves all applications linked to the jobseeker.
3.Job seeker views the list of applied jobs.	4.The system displays job titles, company names, dates applied, and current status.
5.Job seeker clicks on a specific application for more details.	6.The system displays the full application details and any employer feedback.

f. Employer Profile and Vacancy Management, Create Company Profile

Actor: Employer

Goal: To create or update the company's profile on the platform.

Actor	System
-------	--------

1.Employer logs in and navigates to 'Manage Employer Account'.	2.The system displays the company profile form and current information.
3.Employer enters or updates company details (name, address, industry, contact).	4.The system validates the information entered.
5.Employer saves the profile.	6.The system updates the company profile and confirms the changes.

g. Post and Update Job Vacancy

Actor: Employer

Goal: To post new job vacancies and manage existing job listings.

Actor	System
1.Employer navigates to the Job Vacancy section.	2.The system displays the job posting form.
3.Employer fills in job details (title, description, requirements, salary).	4.The system validates the job posting details.
5.Employer submits the job posting.	6.The system forwards the posting to LMD-PESO admin for approval.
	7.Upon approval, the system publishes the job posting for jobseekers to view.

h. View Applicants and Update Applicant Status

Actor: Employer

Goal: To review applicants and update their application statuses.

Actor	System
1.Employer navigates to the applicant list for a job posting.	2.The system displays all applicants with their profiles and resumes.
3.Employer reviews an applicant's profile and resume.	4.The system presents the full applicant details.

5. Employer updates the applicant's status (e.g., Shortlisted, For Interview, Hired, Rejected).	6. The system records the status update and sends a notification to the jobseeker.
---	--

3. Use Case Title: Match Jobs and Applications

Description: This use case enables the system to automatically match jobseekers with relevant job postings based on skills, qualifications, and employer requirements.

Primary Actor: Job Seeker, Employer

Goal: To intelligently match qualified jobseekers to suitable job opportunities.

Pre-Conditions:

- The jobseeker must have a complete profile with skills and qualifications.
- Active and approved job postings must be available in the system.

Post-Conditions:

- A list of matched jobs is displayed to the jobseeker.
- A list of matched applicants is displayed to the employer.

a. Find and Explore Jobs

Actor: Job Seeker

Goal: To discover job opportunities that match the jobseeker's profile and preferences.

Actor	System
1. Job seeker navigates to the Find and Explore Jobs section.	2. The system analyzes the jobseeker's profile and retrieves relevant job matches.
3. Job seeker browses matched job listings.	4. The system displays job titles, company names, salary ranges, and match scores.
5. Job seeker applies to a preferred job.	6. The system records the application and notifies the employer.

b. View Applicants

Actor: Employer

Goal: To view and evaluate applicants matched to an active job posting.

Actor	System
1.Employer navigates to their active job postings.	2.The system displays the list of applicants for each job posting.
3.Employer clicks on a job posting to view matched applicants.	4.The system displays applicant profiles, resumes, and match scores.
5.Employer reviews and shortlists applicants.	6.The system records the employer's shortlist and notifies selected applicants.

4. Use Case Title: Search Opportunities

Description: This use case enables jobseekers to search and explore available job opportunities on the platform using filters such as job title, location, and industry.

Primary Actor: Job Seeker

Goal: To find and explore relevant job opportunities available on the platform.

Pre-Conditions:

- Active and approved job postings must be available in the system.
- The jobseeker may or may not be logged in to browse listings.

Post-Conditions:

- The jobseeker is presented with a list of job opportunities matching their search criteria.
- The jobseeker can apply to a job directly from the search results.

a. Search and Filter Jobs

Actor: Job Seeker

Goal: To locate job postings using keyword and filter-based searches.

Actor	System
1.Job seeker navigates to the Search Opportunities section.	2.The system displays a search interface with filter options.
3.Job seeker enters keywords, location, or filters and submits the search.	4.The system queries the database and retrieves matching job postings.
5.Job seeker browses the search results.	6.The system displays job titles, company names, locations, and brief descriptions.

7.Job seeker clicks on a job listing for full details.	7.The system displays the complete job description, requirements, and an Apply button.
--	--

b. Find and Explore Jobs

Actor: Job Seeker

Goal: To discover additional job opportunities beyond the initial search.

Actor	System
1.Job seeker accesses the Find and Explore Jobs feature.	2.The system presents suggested job listings based on the jobseeker's profile and browsing history.
3.Job seeker explores and selects a job to view details.	4.The system displays the full job description and application information.
5.Job seeker applies to the job.	6.The system records the application and notifies the employer.

5. Use Case Title: Verify Employer Registration

Description: This use case enables LMD-PESO Head/Staff to review and verify employer registrations by evaluating submitted documents before granting full platform access.

Primary Actor: LMD-PESO Head/Staff

Goal: To validate and approve legitimate employer accounts, ensuring only verified employers can post job listings.

Pre-Conditions:

- The employer must have submitted a registration request with all required documents.
- LMD-PESO Staff must be logged in with verification privileges.

Post-Conditions:

- The employer's registration status is updated to Verified or Rejected.
- The employer is notified of the verification decision.

a. Submit Documents

Actor: Employer

Goal: To submit required documents for employer registration verification.

Actor	System
1.Employer navigates to the registration verification section.	2.The system displays the required document submission form.
3.Employer uploads required business documents.	4.The system validates the file formats and stores the documents.
5.Employer submits the documents for review.	6.The system records the submission and notifies LMD-PESO Staff for review.

b. Approve Registration

Actor: LMD-PESO Head/Staff

Goal: To approve verified employer registrations and grant platform access.

Actor	System
1.Staff navigates to the Verify Employer Registration section.	2.The system displays a list of pending employer registrations with submitted documents.
3.Staff reviews the employer's documents and information.	4.The system presents the documents and employer details for thorough review.
5.Staff approves the registration.	6.The system updates the employer's status to 'Verified' and sends a notification to the employer.

c. Reject Registration

Actor: LMD-PESO Head/Staff

Goal: To reject incomplete or fraudulent employer registrations.

Actor	System
-------	--------

1.Staff reviews the employer's documents and finds them insufficient.	2.The system presents the submitted documents for staff evaluation.
3.Staff selects 'Reject' and provides a reason.	6.The system records the rejection reason in the database.
	7.The system updates the employer's status to 'Rejected' and sends a notification with the rejection reason.

6. Use Case Title: Utilize Messages

Description: This use case facilitates communication between platform users through the built-in messaging and notification system, including file attachments.

Primary Actor: Job Seeker, Employer, LMD-PESO Head/Staff

Goal: To facilitate seamless and organized communication between all platform users.

Pre-Conditions:

- Both sender and recipient must have active accounts on the system.
- The messaging module must be accessible from the user dashboard.

Post-Conditions:

- Messages are delivered and stored in the recipient's inbox.
- Notifications are sent to the recipient upon receiving a message.

Actor	System
1.User accesses the Messaging feature from the dashboard.	2.The system displays the inbox with all conversation threads.
3.User selects a recipient and composes a message.	4.The system validates the recipient and message content.
5.User sends the message.	6.The system delivers the message and records it in the conversation thread.
	7.The system sends a notification update to the recipient.

7. Use Case Title: Manage Notification

Description: This use case allows users and LMD-PESO Staff to manage notification preferences and view system-generated alerts related to job applications, approvals, messages, and other platform activities.

Primary Actor: Job Seeker, Employer, LMD-PESO Head/Staff

Goal: To ensure all users receive timely and relevant notifications about activities affecting them on the platform.

Pre-Conditions:

- The user must be logged in with an active account.
- Notification settings must be enabled in the system.

Post-Conditions:

- Users are informed of relevant updates in real time.
- Notification preferences are saved for future interactions.

Actor	System
1.User logs in and navigates to the Notifications panel.	2.System event occurs (job match, application status, etc.)
3.User browses through notification items.	4.System generates real-time notification
5.User clicks on a notification item.	6.The system marks the notification as read and redirects the user to the relevant section.
7.User can manage notification preferences	

8. Use Case Title: Manage System Administration Reports

Description: This use case enables LMD-PESO Head/Staff to oversee and manage overall system operations, including approving job postings, monitoring user activities, and maintaining system audit trails.

Primary Actor: LMD-PESO Head/Staff

Goal: To ensure smooth, accountable, and secure system operations through comprehensive administrative oversight.

Pre-Conditions:

- The LMD-PESO Staff must be logged in with administrator-level privileges.
- System modules for job approval, monitoring, and audit must be accessible.

Post-Conditions:

- Job postings are approved or rejected with notifications sent to employers.
- User activities are monitored and logged for accountability and review.

Actor	System
1.Staff can access centralized dashboard	2.The system displays a list of pending job postings submitted by employers.
3.Staff navigates to the Job Posting Approval section.	4.The system presents the full job description, requirements, and employer information.
5.Staff reviews the job posting details.	6.The system publishes the job posting and notifies the employer of the approval.
7.Staff approves the job posting.	8.The system records the rejection and notifies the employer with the reason.
9.Staff rejects the job posting if it does not meet standards.	10.System records all administrative actions
11.Admin maintains activity logs and audit trails	
12.Admin generates reports for accountability	

APPENDIX J

Field Name	Data Type	Constraints
edu_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
profile_id	int	FOREIGN KEY → applicant_profiles(profile_id), NOT NULL
highest_education_level	enum	NOT NULL, ENUM
school_university	varchar	NOT NULL
year_graduated	int	DEFAULT NULL

Table 6: work_experiences

Field Name	Data Type	Constraints
exp_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
profile_id	int	FOREIGN KEY → applicant_profiles(profile_id), NOT NULL
company_name	varchar	NOT NULL
position	varchar	NOT NULL
date_from	date	NOT NULL
date_to	date	DEFAULT NULL (can be current/ongoing)

Table 7: technical_skills

Field Name	Data Type	Constraints
skill_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
profile_id	int	FOREIGN KEY → applicant_profiles(profile_id), NOT NULL
skill_name	varchar	NOT NULL
proficiency_level	enum	NOT NULL, ENUM('beginner', 'intermediate', 'advanced')
years_experience	int	NOT NULL

Table 8: job_preferences

Field Name	Data Type	Constraints
pref_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
profile_id	int	FOREIGN KEY → applicant_profiles(profile_id), NOT NULL
preferred_occupation	varchar	DEFAULT NULL
preferred_industry	varchar	DEFAULT NULL

Table 9: job_vacancies

Field Name	Data Type	Constraints
job_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
employer_id	int	FOREIGN KEY → employer_profiles(employer_id), NOT NULL
position_title	varchar	NOT NULL
job_description	text	NOT NULL
salary_php	decimal	DEFAULT NULL
vacancy_count	int	NOT NULL, DEFAULT 1
status	enum	NOT NULL, ENUM('open', 'closed', 'filled')

Table 10: applications

Field Name	Data Type	Constraints
application_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
profile_id	int	FOREIGN KEY → applicant_profiles(profile_id), NOT NULL
job_id	int	FOREIGN KEY → job_vacancies(job_id), NOT NULL
match_score	decimal	DEFAULT NULL
applied_at	timestamp	NOT NULL, DEFAULT CURRENT_TIMESTAMP

Table 11: application_status

Field Name	Data Type	Constraints
status_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
application_id	int	FOREIGN KEY → applications(application_id), NOT NULL
status_value	enum	NOT NULL, ENUM('pending', 'reviewed', 'accepted', 'rejected')
remarks	text	DEFAULT NULL
changed_at	timestamp	NOT NULL, DEFAULT CURRENT_TIMESTAMP

Table 12: notifications

Field Name	Data Type	Constraints
notif_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
recipient_id	int	FOREIGN KEY → users(user_id), NOT NULL
notif_type	enum	NOT NULL, ENUM
title	varchar	NOT NULL
is_read	boolean	NOT NULL, DEFAULT FALSE
sent_at	timestamp	NOT NULL, DEFAULT CURRENT_TIMESTAMP

Table 13: reports

Field Name	Data Type	Constraints
report_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
generated_by	int	FOREIGN KEY → users(user_id), NOT NULL
report_type	enum	NOT NULL, ENUM
parameters	json	DEFAULT NULL
generated_at	timestamp	NOT NULL, DEFAULT CURRENT_TIMESTAMP

Table 14: audit_logs

Field Name	Data Type	Constraints
log_id	int	PRIMARY KEY, NOT NULL, AUTO_INCREMENT
user_id	int	FOREIGN KEY → users(user_id), NOT NULL
action	varchar	NOT NULL
table_affected	varchar	NOT NULL
logged_at	timestamp	NOT NULL, DEFAULT CURRENT_TIMESTAMP

APPENDIX M

SWOT Analysis

Table 15: Result of SWOT Analysis for Operational Feasibility

Strengths	Weaknesses
- Strong partnerships with government agencies (DOLE, TESDA, DTI, DMW, OWA, DSWD) and LGUs, enabling job fairs, training, and livelihood programs. - Clear service processes: referral, placement, registration, career guidance, and job matching. - Regular reporting mechanisms (SPRS, PACE system, Excel File backups) ensure accountability - Staff familiarity with NSRP and LMI forms supports standardized data collection.	- Dependence on internet connectivity and system stability; outages cause delays. - Duplicate tasks and redundant paperwork (e.g., jobseekers applying both online and in person). - Limited private sector job postings compared to government vacancies. - Staff capacity stretched across multiple programs (SPES, livelihood, CDSP, job fairs).
Opportunities	Threats
- Automation of manual tasks (sorting, data entry, duplicate detection) to reduce inefficiencies. - Expansion of private industry partnerships to diversify job opportunities. - Enhanced training for staff in data management and digital systems. - Integration of updated labor market information from schools and courses to improve job matching	- Power interruption. - Unstable internet connection. - Data privacy restrictions limit access to external agency datasets. - Budget constraints may hinder system upgrades or staff expansion. - Risk of turnover among trained staff, affecting continuity. - Competition from other recruitment platforms offering faster or more automated services.

Table 15 presents the SWOT Analysis for the STRAM-PESO system, highlights that the system benefits from strong institutional support through partnerships with government agencies and LGUs, alongside clear service processes and standardized reporting mechanisms. These strengths ensure accountability and structured service delivery. However, weaknesses such as dependence on internet connectivity, redundant paperwork, and limited private sector engagement pose challenges to efficiency. Opportunities lie in automating manual tasks, expanding private partnerships, and enhancing staff training, while threats such as unstable internet, budget constraints, and competition from private recruitment platforms may hinder sustainability

GAP ANALYSIS

Table 16: Result of GAP Analysis for Operational Feasibility

Available Resources for Development	Resources Needed	Available Resources for Development	Resources Needed
Project Personnel: Administrative Aides (IT Personnel) Vincent Bryan M. Manrique Alvin DC. Paglinawan Kiervin P. Rosales Harold Jay Siena	Project Personnel: At least 1 administrative aide	Project Personnel: Administrative Aides (IT Personnel) Vincent Bryan M. Manrique Alvin DC. Paglinawan Kiervin P. Rosales Harold Jay Siena	Project Personnel: At least 1 administrative aide
Equipment (Hardware): Computer Set ● 5 12GB HDD, 8GB DDR4 RAM, Intel i3 9th Gen ● 2 3.8 “ Desktop Monitor	Equipment (Hardware): ● 256GB HDD, 8GB DDR4 RAM, Intel i3 9th generation/AMD Ryzen 3 ● 23.8 in. if Desktop Monitor ● 14 in. if Laptop Monitor	Equipment (Hardware): Computer Set ● 512GB HDD, 8GB DDR4 RAM, Intel i3 9th Gen ● 23.8 “ Desktop Monitor	Equipment (Hardware): ● 256GB HDD, 8GB DDR4 RAM, Intel i3 9th generation/AMD Ryzen 3 ● 23.8 in. if Desktop Monitor ● 14 in. if Laptop Monitor
Software: Windows 10 Operating System	Software: Windows 10 Operating System	Software: Windows 10 Operating System	Software: Windows 10 Operating System

Table 16 of gap analysis shows that administrative aides with IT skills and basic hardware/software resources are already available, providing a foundation for system operations. However, additional personnel and upgraded equipment are needed to fully support the workload and ensure smooth operations. This indicates that while the system is operationally feasible, resource reinforcement is necessary to maximize efficiency.

APPENDIX N

SWOT ANALYSIS

Table 17: Result of SWOT Analysis for Technical Feasibility

Strengths	Weaknesses
• The project team has baseline IT knowledge and experience in system deployment. • Compatible with widely used operating systems (Windows 10/11) and browsers (Edge, Chrome). • Existing LGU laptops and desktops can run the system with minimal upgrades. • System design allows linkage with national employment databases	• Limited advanced expertise in system administration and data analytics. • Some devices have low memory/storage, limiting performance. • Inconsistent internet access.
Opportunities	Threats
• Training programs can enhance technical skills of LGU staff. • Upgrading to SSDs and higher RAM improves speed and reliability. • Cloud hosting and database management tools can strengthen scalability. • Potential integration of mobile apps and AI-based job-matching algorithms.	• Power interruption. • Unstable internet connection. • Risk of turnover among trained staff. • Cybersecurity vulnerabilities if systems are not regularly maintained. • Disruption due to natural causes. • Budget Limitation for hardware upgrades. • Private job-matching platforms with advanced features may challenge adoption.

Table 17 presents the SWOT analysis of technical feasibility, demonstrates that the project team has baseline IT knowledge and the system is compatible with widely used operating systems and browsers. Existing LGU hardware can support deployment with minimal upgrades, and the design allows linkage with national employment databases. Weaknesses include limited advanced expertise and inconsistent internet access, while opportunities exist in staff training, hardware upgrades, and integration of cloud hosting and AI-based job matching. Threats such as cybersecurity risks, budget limitations, and competition from private platforms highlight the need for proactive technical safeguards.

GAP ANALYSIS

Table 18: Result of GAP Analysis for Technical Feasibility

Available Resources for Development	Resources Needed	Available Resources for Development	Resources Needed
Project Personnel: Frontend/Backend Dev, System Analyst, Database and UI/UX Designer, Database Administration	Project Personnel: At least 2 MERN (Frontend/Backend), 1 system analyst, 1 UI/UX Designer, 1 Database Administrator	- 1 Frontend/Backend Dev, System Analyst - 1 UI/UX Designer - 2 Database Administrator	1 co-programmer alongside the MERN developer
Equipment (Hardware): Acer Aspire Lite 14" (Specs: 512GB ROM, 8GB DDR5 RAM, Intel i3 12th gen) Lenovo Ideapad Slim 1 16" (Specs: 512GB ROM, 8GB LPDDR5 RAM, AMD Ryzen 5 7520u)	Equipment (Hardware): 14" Laptop, 256GB ROM, 8GB DDR4 RAM, Intel i3 9th gen • Monitor	Equipment with required specifications is available	• None
Software: Windows 11 Operating System	Software: Windows 10 Operating System	Required Operating System is Available	None

Table 18 presents a gap analysis of technical feasibility, revealing that essential personnel such as developers, analysts, and designers are available, supported by modern laptops and updated operating systems. However, additional MERN developers, a co-programmer, and specialized staff are required to strengthen technical capacity. This confirms that the system is technically feasible but dependent on personnel expansion and training to ensure scalability and reliability

APPENDIX O

Economic Feasibility

Table 19. Breakdown Representation (Supplies and Materials) of the Total Cost of the Existing System

Supplies and Materials	Unit	Quantity	Unit Cost	Total Cost
laptop	Set	12	28,000.00	336,000.00
Printer	Set	8	8,790.00	70,320.00
A4 Bond Paper	Boxes	20	900.00	18,000.00
Long Bond Paper	Boxes	18	1000.00	18,000.00
Ballpen	Boxes	1	80.00	80.00
Thermal ink	Set	6	1,000.00	6,000.00
Black Ink	Bottles	12	130.00	1,560.00
Colored Ink	Bottles	7	130.00	910.00
Folder long	Pcs	200	20.00	4,000.00
Envelop (long)	Pcs	1000	18.00	18,000.00
Xerox machine	Set	1	15,000.00	15,000.00
Staple wire	Boxes	3	50.00	150.00
Stapler	Piece	3	115.00	345.00
Permanent Marker	Boxes	3	500.00	1,500.00
Puncher	Pcs	3	250.00	750.00
Fastener	Boxes	10	370.00	3,700.00
File box	Pcs	50	600.00	30,000.00
Storage cabinet	Set	2	15,000.00	30,000.00
Durabox cabinet	set	2	1,000.00	2,000.00
Total Cost				550,620.00

Table 20. Operational Cost of the Existing System

Supplies and Materials	Year 1	Year 2	Year 3	Year 4	Year 5
Laptop	336,000.00	-	-	-	-
Printer	70,320.00	-	-	-	-
A4 Bond Paper	18,000.00	19,800.00	21,600.00	23,400.00	25,200.00
Long Bond Paper	18,000.00	19,800.00	21,600.00	23,400.00	25,200.00
Ballpen	80.00	88.00	96.00	104.00	112.00
Thermal ink	3,000.00	3,300.00	3,600.00	3,900.00	4,200.00

Black Ink	1,560.00	1716.00	1,872.00	2,028.00	2,184.00
Colored Ink	910.00	1001.00	1,092.00	1,183.00	1,274.00
Folder long	4,000.00	4,400.00	4,800.00	5,200.00	5,600.00
Envelop (long)	18,000.00	19,800.00	21,600.00	23,400.00	25,200.00
Xerox machine	15,000.00	-	-	-	-
Staple wire	150.00	165.00	180.00	195.00	210.00
stapler	345.00	-	-	-	-
Permanent Marker	1,500.00	-	-	-	-
Puncher	750.00	-	-	-	-
Fastener	3,700.00	4,070.00	4,440.00	4,810.00	5,180.00

Storage cabinet	30,000.00	-	-	-	-
Durabox cabinet	2,000.00	-	-	-	-
Total Supplies and Materials	550,620.00	74,140.00	80,880.00	87,620.00	94,360.00

Table 21. Development and Installation Cost of the Proposed System

Maintenance Cost of Proposed System

Table 21.1

MAINTENANCE COST	Amount
Domain Name	550.00
Web- Hosting	1,500.00
Total	2,050.00

Development Cost of the Proposed System

Table 21.2

DEVELOPMENT COST	AMOUNT
Transportation	1,320.00
Electric Consumption	1500.00
Developers Allowance	5,000.00
Supplies used during development	1,200.00
Internet connection	1,100.00
Total	10,120.00

Human Resources Cost of the Proposed System

Table 21.3

Human Resource	AMOUNT
Project Leader/Analyst	96,000.00
Programmer	40,000.00
Project Assistant	20,000.00
Software Tester	6,000.00
Total	162,000.00

Table 22. Breakdown Representation (Supplies and Materials) of the Total Cost of the Proposed System

Supplies and Materials	Unit	Quantity	Unit Cost	Total Cost
laptop	Set	12	28,000.00	336,000.00
Printer	Set	5	8,790.00	43,950.00
A4 Bond Paper	Boxes	11	900.00	10,800.00
Long Bond Paper	Boxes	11	1000.00	11,000.00
Ballpen	Boxes	1	80.00	80.00
Thermal ink	Set	3	1,000.00	3,000.00
Black Ink	Bottles	8	130.00	1,040.00
Colored Ink	Bottles	4	130.00	520.00
Folder long	Pcs	50	20.00	1,000.00
Envelop (long)	Pcs	300	18.00	5,400.00
Xerox machine	Set	1	15,000.00	15,000.00
Staple wire	Boxes	2	50.00	100.00
Stapler	Piece	3	115.00	345.00
Permanent Marker	Boxes	2	500.00	1,000.00
Puncher	Pcs	2	250.00	500.00
Fastener	Boxes	5	370.00	1,850.00
File box	Pcs	20	600.00	12,000.00
Total Cost				443,585.00

Table 23. Operational Cost of the Proposed System

Supplies and Materials	Year 1	Year 2	Year 3	Year 4	Year 5
Laptop	336,000.00	-	-	-	-
Printer	43,950.00	-	-	-	-
A4 Bond Paper	10,800.00	11,880.00	12,960.00	14,040.00	15,120.00

Long Bond Paper	11,000.00	12,100.00	13,200.00	14,300.00	15,400.00
Ballpen	80.00	88.00	96.00	104.00	112.00
Thermal ink	3,000.00	3,300.00	3,600.00	3,900.00	4,200.00
Black Ink	1,040.00	1,144.00	1,248.00	1,352.00	1,456.00
Colored Ink	520.00	572.00	624.00	676.00	728.00
Folder long	1,000.00	1,100.00	1,200.00	1,300.00	1,400.00
Envelop (long)	5,400.00	5,540.00	6,480.00	7,020.00	5,560.00
Xerox machine	15,000.00	-	-	-	-
Staple wire	100.00	110.00	120.00	130.00	140.00
stapler	345.00	-	-	-	-
Permanent Marker	1,000.00	-	-	-	-
Puncher	500.00	-	-	-	-
Fastener	1,850.00	2,035.00	2,220.00	2,405.00	2,590.00
File box	12,000.00	-	-	-	-
Total Supplies and Materials	443,585.00	38,329.00	41,748.00	45,227.00	48,706.00

Table 24. Cost Benefit Analysis Table

Description	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5
Operational Cost of Existing		550,620.00	74,140.00	80,880.00	87,620.00	94,360.00
Development/Installation Cost	- 174,170.00	-	-	-	-	-
Operational Cost of Proposed		443,585.00	38,329.00	41,748.00	45,227.00	48,706.00
Projected Benefit	- 174,170.00	107,035.00	35,811.00	39,132.00	42,393.00	45,674.00
Cumulative Benefit	- 174,170.00	-67,135.00	- 31,324.00	7,808.00	50,201.00	95,855.00

sBreak Even Ratio:

$$\text{Break Even Ratio} = \frac{\text{Project Benefits} - \text{Cumulative Benefit}}{\text{Project Benefit}}$$

Break Even Point:

$$\text{Break Even Ratio} = \frac{107,035.00 - (-67,135.00)}{107,035.00}$$

$$\text{Break Even Ratio} = 1.63$$

Break Even Year = where the values of Cumulative Benefit become positive

$$= \text{year 3}$$

$$\text{Break Even Point} = \text{Break Even Year} + \text{Break Even Ratio}$$

$$= 3 + 1.63$$

$$\text{Break Even Point} = 4.63 \text{ or } 4.6 \text{ or } 4 \text{ year and } 7 \text{ months}$$
