

(0:00) I just want to comment that enrollment is not used for an agency. (0:16) Enrollment is used for schools. (0:20) Is it used for registration? (0:21) It's the same.

(0:23) It's the same for us. (0:26) Enrollment is used for registration. (1:52) I don't know where.

We're just going to comment on it. (2:00) Because there's something like this here. (2:03) It should have been added.

Continuous. (2:06) It's like version 2. (2:11) Enhance. Enhancement.

(2:13) Is that the plan since there's already an existing one? (2:17) The other one isn't finished yet. (2:17) Because we already saw the output of the material that was given to us after the MD-PC. (2:24) There are still improvements that need to be done.

(2:27) Enhancement. (2:32) But I'll start the interview. (2:36) In Section A Organizational Background, (2:39) can you describe the main functions and the daily work here at the PESO office? (2:51) We have our own division.

(2:54) For me, our division has labor market information. (3:01) We're the ones who talk to the job seekers, to the employers, (3:05) to the needs of the labor market here. (3:13) We're the ones who talk to the job seekers and to the people.

(3:20) Because it's not just the job seekers. (3:21) We also have a library that is owned by another division. (3:25) So, that's it.

(3:29) What's nice is that we also have a client for work. (3:36) We also have one for livelihood. (3:40) We also have one for overseas.

(3:43) That's the scenario every day. (3:49) This is my second question. (3:52) What you said earlier, (3:54) are those the services that you provide to the job seekers and employers? (3:58) The overseas, what you said earlier.

(4:01) Overseas, it's not just work. (4:07) It's the former OSW that needs help. (4:15) So, it has a big impact.

(4:17) It's not just work. (4:20) Those are the services that you provide to the employers. (4:24) Can you elaborate on the services that you provide to the job seekers and employers? (4:32) For the employers, (4:34) the job seekers are the ones who help with the work.

(4:36) The job seekers are the ones who help with the work. (4:39) So, the job seekers can't be complete without an employer. (4:43) So, they need an employer.

(4:47) Because the employer is the one who gets the employees. (4:52) So, the employers come from outside. (4:56) Sometimes, they are outside.

(4:57) Sometimes, they are just here. (5:01) So, there's a job fair, local recruitment. (5:05) So, local recruitment is one company.

(5:09) When it's a job fair, there are two to five employers. (5:15) In the job fair, there are overseas, local, and national. (5:23) So, when it's a job fair, they have a meeting where they want to apply.

(5:33) So, the job seeker, (5:36) it's up to the employer what they want to choose. (5:43) Here, when it's a walk-in, walk-in, and posting, (5:47) we refer the job seeker to the employer who has available jobs. (5:55) There are two types.

(5:56) There's a walk-in, and there's an online. (5:59) So, we have more job seekers online. (6:05) How do you conduct the online registration? (6:07) Are there G-Forms? (6:08) Google Forms.

(6:10) We post on our Facebook page. (6:14) Then, there's a link there. (6:15) Then, the job seeker will apply.

(6:17) So, anyone can open a Google Form. (6:21) In the Google Form, they will input information. (6:27) They will send a resume.

(6:29) Then, when the resume arrives here, (6:32) we will print it out and refer it to the employer. (6:38) So, that's our process. (6:40) Then, after that, the employer will refer who has been placed in the job.

(6:49) I'm ready for the third question. (6:52) How many clients do you serve in a year? (6:56) In a year, it depends on the number. (7:02) We have a national agency, a bank government, and a private sector.

(7:11) Last year, we had around 1,000 clients. (7:21) But, if you combine it with the government, it's around 5,000. (7:30) So, all sectors are included? (7:33) Yes, all sectors.

(7:34) So, in the section... (7:36) The government is also included. (7:40) The OJT is also included. (7:41) Then, there are walk-in job seekers and online job seekers.

(7:49) The SPES is also included. (7:51) Then, there is also livelihood training. (7:56) Those are the jobs that we provide throughout the year.

(8:07) So, all of those are included in the 5,000. (8:11) So, let's go to section B. (8:13) You mentioned online registration and walk-in. (8:16) Is that also included? (8:17) How do individuals currently enroll or register with PESO? (8:21) That's what I said earlier.

(8:22) On Facebook, there is a Google link. (8:28) Fifth question. (8:29) Online job applicants submitted through PESO.

(8:32) What information do you collect from the applicants while registering? (8:38) We receive information which is the NSRP form. (8:41) The NSRP form contains all the data. (8:49) After filling out the NSRP form, we will import it to our PESO.

(8:54) So, that is our system from the BLA, Bureau of Labor Employment, with the DOLI. (9:05) So, that is our national system. (9:09) To be honest, we already have a system.

(9:12) What is the name of the system again? (9:24) PESO Employment Information System. (9:34) So, we already have a system. (9:41) But it's not online? (9:44) That system is only used by PESO.

(9:47) Oh, only PESO. (9:48) So, PESO is the one who imports all the information to the system using the NSRP form. (9:56) The NSRP form is the content of the PESO.

(10:01) So, only BLA and DOLI can see the information. (10:11) DOLI and BLA. (10:16) Those are the head office.

(10:20) We are not under the government. (10:23) We also have an agency which is DOLI and BLA. (10:28) So, we import it to PESO.

(10:32) So, it will double if we have a local system. (10:40) But it's better if we have a local system. (10:42) Because the PESO really follows the reporting of the province.

(10:51) What is the monthly report? (10:54) Monthly. (10:55) That's what we call SPRS. (10:57) Statistic Performance.

(11:05) SPRS. (11:06) That's our reporting. (11:07) That's also what we get from PESO.

(11:10) So, maybe the local PESO. (11:18) Can it be... (11:28) No. (11:30) Can it be easily... (11:33) Like what I said, Google form.

(11:35) Can it be replaced with a Google form? (11:37) The one you have. (11:39) Can it be... (11:41) So, it can be easily distributed in the province. (11:43) Yes, it can be easily distributed.

(11:43) You can install job secrets. (11:46) Can it be... (11:48) It's web-based. (11:49) You can install it if it's web-based.

(11:53) If it's installed, it's hard. (11:56) Let's just do it web-based. (11:58) Let's go to the 6th question.

(12:02) How do you track the job applications submitted here in PESO? (12:07) It's in Google. (12:09) It's in Google. (12:10) You can see it there.

(12:11) You can see who submitted it, where they submitted it. (12:16) Because there are checklists. (12:18) What company you submitted it to.

(12:23) There's a checklist there. (12:25) It's not just information. (12:26) It's a checklist.

(12:27) You check there where you will submit it. (12:30) Forms and sheets. (12:31) If it's a sheet, it's a spreadsheet.

(12:33) You also monitor it. (12:34) Yes, we monitor it. (12:35) So, let's go to the 7th question.

(12:37) What are the challenges that PESO faces in managing an applicant record? (12:48) Sometimes, there's a lack of information. (12:51) There's a lack of information. (12:53) Then, the resume they submit is not updated.

(13:02) It's not updated. (13:04) Their information is not updated. (13:06) Sometimes, there's no picture.

(13:08) Sometimes, maybe they're just answering on their cell phone. (13:11) Sometimes, they're just answering on their cell phone. (13:13) Sometimes, it's hard for them to submit a resume.

(13:15) Maybe they're making a mistake. (13:17) Sometimes, there's an input. (13:21) Sometimes, it duplicates.

(13:23) But it's easy. (13:25) Sometimes, if there's a comma or a period that's wrong, it automatically duplicates. (13:32) But it's easy.

(13:33) It's easy to duplicate. (13:35) So, let's go to section C. (13:37) 8th question. (13:39) This is what you mentioned earlier, right? (13:43) The PESO.

(13:44) That's the currently used digital system or portal. (13:49) Okay, PESO. (13:50) So, what are the strengths and weaknesses of PESO? (13:54) It's not that updated when it comes to vacancies and other information in schools.

(14:04) But it's just a simple government position. (14:14) Those who are involved in PESO. (14:18) Since lately, it's been easy.

(14:21) Those who are in the private sector, it's been easy. (14:25) But it's updated. (14:27) It's the PESO system.

(14:29) It's the system. (14:31) I'm not sure. (14:32) Because it's a manual process.

(14:35) It's just walk-in, walk-in. (14:36) Yes. (14:37) If there are vacancies here, they need to fill out an SRP form.

(14:45) So, let's go to the last section. (14:48) Needs and Expectations. (14:49) 11th question.

(14:50) What features do you want to see in the possible development of the PESO registration and application portal? (15:01) Nothing. (15:01) I don't know. (15:04) I don't know.

(15:12) It can be accessed by everyone. (15:15) Accessible. (15:17) By the employer and job seeker.

(15:20) Then, there's only us who can see who has entered. (15:31) It's like integrated. (15:33) Since it's Google Forms, it's integrated.

(15:36) Yes. (15:36) So, it's easy to access the employer. (15:40) It's easy for the employer to input his job vacancies.

(15:45) It's easy for the job seeker to input his information. (15:48) What kind of job he wants. (15:50) It can also refer automatically.

(15:54) It can also place automatically. (15:56) It's only local. (15:58) It's only here in our province.

(16:01) So, where are we now? (16:04) All important is this time, the web is offline and local. (16:09) It's important because it's easier to process what's needed. (16:15) Less paperwork.

(16:17) Less paperwork. (16:18) It's also easier to access because it's far from here. (16:22) That's why we created the Google Forms that we're using now.

(16:27) It's because of the pandemic. (16:30) We're not allowed to go outside. (16:31) So, that's why.

(16:33) So, for the 13th question, what other data privacy concerns do we need to consider for the applicant information? (16:46) I don't think there's any. (16:47) I don't think there's any. (16:50) As long as their information is not released.

(16:53) It's only here. (16:56) I don't know who has it. (16:58) It's only there.

(16:59) It's a secure database. (17:02) It's secure. (17:03) So, it won't be hacked.

(17:05) So, last question. (17:22) In Excel, there's something like that. (17:25) What's that? (17:27) Soft copy? (17:28) Soft copy.

(17:32) The statistics of the applicants?
